

Mister Boardwalk by Access Rec, LLC Beach Access Walkways

We use only HIGH QUALITY, DURABLE materials to make Mister Boardwalk® Products.

Mister BOARDWALK® "Roll Out" products are UNIQUE. This patented construction uses NO NAILS or SCREWS! Instead, horizontal holes are drilled through the slat material. Then, marine grade NYLON CORD passes through the holes to assemble the product.

"Roll Out" Assembled with Nylon Cord

"Flex" Assembled with Stainless Steel Rod

Products assembled with NYLON CORD generally ROLL OUT (or ROLL UP) for easy installation & removal, so we call this "ROLL OUT" Construction.

Products assembled with STAINLESS STEEL RODS are shipped in semi-rigid sections that flex in all directions, contouring to almost any surface, even turning slightly to the left or right for curves. The sections quickly & easily bolt together. We call this "Flex" Construction.
